Dear Water Taker:

According to the rules of the Dunstable Water Department, you are responsible for the upkeep and repair of the service line between the water main in the street and your house.

The Water Department will repair and/or replace the service line on town property. The repair and/or replacement of the service line on your property, however, must be undertaken by you using a licensed installer and approved by the Water Department. This installer will be responsible for any damage to your property (i.e. lawns, shrubs, hot top).

PLEASE NOTE: The Water Department is not a party to this agreement; it is between the water taker and the installer. The Water Department's role is to supervise that the service line is properly installed.

Application for water service must be made to the Water Commissioners and be signed by the owner of the premises to be supplied or his duly authorized agent. The applicant must state the use for which the service is required and that no other use thereof shall be made. An application fee (see schedule of rates and fees) shall be paid with the application subject to a credit against such fee for any betterment charge assessed to the property for any improvement to the water system, at the rate \$500.00.

Approved:

**Water Commissioners:**
